

SHEEP CONFINEMENT PELLETS

ABOUT OUR PELLETS

- Sheep Confinement Pellets are a high protein supplement to be fed in conjunction with cereal hay or straw for deferral of grazing by late gestation ewes.
- Contain a comprehensive macro-mineral, trace element and vitamin package to suit WA conditions.
- To achieve body condition targets they can be fed at a variable rate depending on the quality of roughage
- Ewes must be appropriately introduced or transitioned to Confinement Pellets and transitioned out of confinement onto established pasture or forage crop.
- Once ewes have been introduced to grain-based rations, they must have continuous access for the feeding period.
- Roughage and potable water should be continuously available.
- Sheep on grain-based rations should be fully immunised against clostridial diseases.
- Our standard pellet size is 6mm.

TYPICAL INGREDIENTS

- May contain one or more of the following due to seasonal variations: Oat hulls, Barley, Wheat, Lime, Salt.
