

SHEEP STARTER PELLETS

ABOUT OUR PELLETS

- Kojonup Feeds Sheep Starter Pellets are a high protein, moderate energy grain-based pellet designed primarily as an introduction for lambs prior to the finishing phase in the feedlot.
- Kojonup Feeds Sheep Starter Pellets contain a comprehensive macro-mineral, trace element and vitamin package to suit WA conditions.
- Can be fed in conjunction with a palatable roughage in the feedlot or used as a supplement in conjunction with pasture during backgrounding in the paddock.
- Once sheep have been introduced to grain-based rations on their path to finishing they must have continuous access.
- Potable water should be continuously available.
- All sheep on grain-based rations should be fully immunised against clostridial diseases.
- Our standard size Pellet is 6mm.

TYPICAL INGREDIENTS

- May contain one or more of the following due to seasonal variations: Oat hulls, Barley, Wheat, Lupins, Lime, Salt.
- Macro-mineral, trace element and vitamin premix.
- Kojonup Feeds Pellets DO NOT contain Urea

FEEDING GUIDE

- Kojonup Feeds Sheep Starter Pellets are designed for introducing sheep or lambs to Kojonup Feeds Sheep Finisher Pellets in a feedlot. They are safe to feed straight to sheep whether in self-feeders or trail fed.
- Starter Pellets can also be used to meet more moderate levels of performance such as deferral feeding of mature sheep.
- The recommended rate of feeding will depend on the desired level of performance and the nature of any complimentary feed base.
- Provide free access to good quality drinking water at all times.
- Voluntary intake of this product will typically be 2-2.5% of live weight.

NUTRITIONAL ANALYSIS

- Crude Protein 18%
- Metabolisable Energy 10MJ/kg

STORAGE INSTRUCTIONS

- Store in a cool, clean and ventilated place.
- Protect from insects and vermin.
- When stored under the correct conditions, best before 12 months from packing date.

THIS PRODUCT DOES NOT CONTAIN RESTRICTED ANIMAL MATERIAL AND CAN BE FED TO RUMINANTS
